## NOTICE

Consumer Electronics Association (CEA<sup>®</sup>) Standards, Bulletins and other technical publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Existence of such Standards, Bulletins and other technical publications shall not in any respect preclude any member or nonmember of CEA from manufacturing or selling products not conforming to such Standards, Bulletins or other technical publications, nor shall the existence of such Standards, Bulletins and other technical publications preclude their voluntary use by those other than CEA members, whether the standard is to be used either domestically or internationally.

Standards, Bulletins and other technical publications are adopted by CEA in accordance with the American National Standards Institute (ANSI) patent policy. By such action, CEA does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Standard, Bulletin or other technical publication.

*Note: The user's attention is called to the possibility that compliance with this standard may require use of an invention covered by patent rights.*

*By publication of this standard, no position is taken with respect to the validity of this claim or of any patent rights in connection therewith. The patent holder has, however, filed a statement of willingness to grant a license under these rights on reasonable and nondiscriminatory terms and conditions to applicants desiring to obtain such a license. Details may be obtained from the publisher.*

This CEA Standard is considered to have International Standardization implication, but the International Electrotechnical Commission activity has not progressed to the point where a valid comparison between the CEA Standard and the IEC document can be made.

This Standard does not purport to address all safety problems associated with its use or all applicable regulatory requirements. It is the responsibility of the user of this Standard to establish appropriate safety and health practices and to determine the applicability of regulatory limitations before its use.

(Formulated under the cognizance of the CEA R4 WG4 Antenna/DTV Interface.)

## **FOREWORD**

This standard, CEA-909-A, was developed under the auspices of the Consumer Electronics Association (CEA) R4 Video Systems Committee.

In Figure 9 on page 16, the number six at the bottom of the figure should appear as a six in all future versions of this standard.

## CONTENTS

1 Scope .....	1
2 References .....	1
2.1 Normative References .....	1
2.1.1 Normative Reference List .....	1
2.1.2 Normative Reference Acquisition .....	1
3 Initialization.....	1
4 Data Signaling Characteristics.....	2
4.1 Transmission Rate.....	2
4.2 Symbol Rate .....	2
4.3 Symbol Period.....	2
4.4 Symbol Rise & Fall Time.....	2
4.5 Logic 0 .....	2
4.6 Logic 1 .....	2
5 Power Supply.....	2
6 Defined Interfaces .....	2
6.1 Separate Connector .....	2
6.1.1 Data Voltage Levels.....	3
6.1.2 Detection of Antenna Interface Usage .....	3
6.1.3 Connector .....	3
6.2 Shared Connector .....	5
6.2.1 Voltage Levels .....	5
6.2.2 Detection of Antenna Interface Usage.....	5
7 Mode A .....	8
7.1 Programming Mode A.....	8
7.1.1 Automatic Programming.....	8
7.1.2 Manual Programming.....	8
8 Mode B .....	9
8.1 Reserved Mode B Program Identifier Ranges.....	10
Annex A Examples (Informative).....	11
A.1 Example 1 - TV Emulator/Data Stream Transmitter .....	11
A.2 Example 2 - Antenna Emulator/Data Stream Receiver .....	13
A.3 Example 3 - Example Implementation for Shared Connector .....	21
Annex B Example Applications for CEA-909-A (Informative) .....	22
B.1 Example 1 - Simple Set Top Antenna with Pre-Amp.....	22
B.2 Example 2A - Four In, One Out RF Switch.....	22
B.3 Example 2B - Multiple Inputs, One Output .....	22
B.4 Example 3A - Mechanical Antenna Rotor with Programmable Pointing Direction.....	22
B.5 Example 3B - Mechanical Antenna Rotor with 4-bit Direction Code .....	22
B.6 Example 4 - Mast-Mounted Preamp Seeking Gain Control Bits Plus RF Channel Number ...	22
B.7 Example 5 - Compact Set-top Antenna with Horizontal & Vertical Dipole Elements.....	23
B.8 Example 6 - Multiplexed Control Signals onto RF Coaxial Cable Center Conductor .....	23
B.9 IR Remote Control for Antenna .....	23
